## EDUCATION

### Washington University in St. Louis

Ph.D. in Computational and Systems Biology

St. Louis, MO

2016–2021

### National Taiwan University

M.S. in Biomedical Electronics and Bioinformatics

Taipei

B.S. in Electrical Engineering and minor in Economics

2014–2016

2009–2014

## EXPERIENCE

### Moderna

Senior Scientist, Oncology Bioinformatics

Cambridge, MA

Scientist, Oncology Bioinformatics

Mar 2025–Present

Apr 2023–Mar 2025

- Led integration of diverse omics tools and algorithms for mutation calling, gene expression quantification, neoantigen prediction, tumor purity assessment, and HLA typing to advance personalized cancer vaccine development (Individualized Neoantigen Therapy; INT).
- Collaborated closely with engineering team to develop and validate end-to-end Nextflow pipeline for personalized cancer vaccine design, meeting critical timelines for regulatory review.
- Led implementation of key NGS quality control metrics in cancer vaccine related bioinformatic pipelines to meet compliance with regulatory agencies and internal performance evaluation.
- Developed standardized data processing and benchmarking criteria to evaluate 4+ NGS sequencing workflows and vendors, enhancing INT program capabilities.
- Managed CRO team of 5 members, coordinating data analysis efforts and overseeing method evaluation and pipeline development to support INT initiatives.

### Mandatory National Service

Substitute Services Draftee

Taipei

Mar 2022–Mar 2023

### Washington University in St. Louis

PhD Research, Li Ding Lab

St. Louis, MO

Sep 2016–Dec 2021

- Collaborated with leading cancer research communities including The Cancer Genome Atlas (TCGA), Clinical Proteogenomic Tumor Analysis Consortium (CPTAC), and Human Tumor Atlas Network (HTAN).
- Led the data analysis team of CPTAC glioblastoma study, coordinating efforts across multiple institution, to identify different patient stratifications and druggable targets in signaling pathways using multi-omics analysis with multiplexed mass spectrometry and bulk genomics.
- Investigated tumor heterogeneity and microenvironment using single cell sequencing, spatial transcriptomics and multiplexed imaging (Hyperion, CODEX).
- Developed tools, processing pipelines, and databases (PTMcosmos, CharGer) to analyze multi-modal datasets.
- Conducted quality control analysis on different versions of the mutation calling pipeline on the NCI Genomics Data Commons, a platform hosting and reprocessing data of multiple cancer genome programs.

### Open Source Software

Contributor

Online

2015–Present

- Contributed to the development of open source tools and projects including conda-forge, bioconda, and cyvcf2.
- Demonstrated proficiency in the software development workflow, including testing, packaging, CI/CD, issue triaging, and documentation.

### Pinkoi

Internship

Taipei

Summer 2015

- Enhanced the search functionality on Pinkoi, Asia's leading online marketplace for original design goods.
- Investigated various Mandarin/Chinese text segmentation methods in ElasticSearch

- Developed a product recommendation system when user's search query failed to match any exact product by implementing a Word2Vec-based semantic search.

### **Microsoft Research Asia**

Beijing

Research Internship, Eric Chang Group

2014–2015

- Investigated the use of deep learning for histopathology image and pathway analysis in the brain and colon cancer.
- Achieved highly accurate histopathology image classification and segmentation using convolutional neural network (CNN) based models.
- Analyzed the CNN activation features and discovered that the model was able to accurately identify key morphological features and ignore irrelevant background noise as identified by pathologists.

### **National Taiwan University**

Taipei

Master's Research, Eric Y. Chuang Lab

2014–2016

- Developed a cloud platform to process and analyze sequencing data, including a web portal, a data processing job queue scheduler, and a database to track data and visualize results.

## **SKILLS**

---

**Programming languages:** Python (general purpose), R (data analysis, statistics, visualization), SQL

**Analysis tools:** (bio)conda, Nextflow, Snakemake, tidyverse, Bioconductor genomics-related tool stack

**Databases:** PostgreSQL, SQLite, DuckDB

**Tool development:** Python packaging (pytest, Sphinx), GitHub Actions/Workflow

**Cloud/HPC computing:** AWS, GCP, Azure, Docker

**Web development:** Django, Flask, basic frontend knowledge

## **LEADERSHIP EXPERIENCE**

---

### **Tech communities**

2013–Present

Speaker at PyCon APAC & Taiwan & China and Taiwan & China R conferences, Taipei Bioinformatics Omnibus and other R and Python local meetups

- Presented technical topics including Snakemake, genomic analysis, visualization, text search, statistics, convolutional neural network, HDF5, and parallel computing
- Past presentations available at [blog.liang2.tw/talks](http://blog.liang2.tw/talks)

### **PyCon Taiwan**

2016

Program Committee Chair

- Oversaw a team of 11 volunteers
- Coordinated the main theme and agenda planning of the 3-day conference with 50 talks and 700+ attendees
- Headed the talk proposal review process and keynote speaker invitations
- Introduced a new double blind multi-stage peer review system

### **PyCon APAC**

2015

Public Relations Manager

### **Taiwan R User Group**

2013–2016

Organizer and Host

## **SCHOLARSHIPS & AWARDS**

---

- 1<sup>st</sup> place in Three-Minute Thesis competition at McDonnell Academy 2021
- McDonnell International Scholars Academy, WUSTL 2016–2021
- Taiwan Ministry of Education WUSTL Scholarship 2016–2021
- Outstanding Summer Research Award, Center of Genomic Medicine, NTU 2012
